PROFESSIONAL SUMMARY

A passionate and results-driven Full Stack Developer with a growing specialization in AI, focused on building scalable, high-performance solutions that solve real-world business challenges. Skilled across the full development stack with hands-on experience in modern web technologies, backend systems, and intelligent application development. Proficient in writing clean, maintainable, and efficient code while transforming complex technical concepts into practical, user-centric products. Continuously exploring cutting-edge AI technologies and automation systems to develop smarter, future-ready solutions that drive innovation, efficiency, and business growth.

TECHNICAL SKILLS

- **Frontend:** TypeScript, JavaScript (ES6+), React.js, Next.js, Vue.js, Tailwind
- **Backend:** Node.js, Python, Express.js, FastAPI, Fastify, REST APIs
- **Databases:** MongoDB, SQL(PostgreSQL), Firebase
- **AI & Automation:** TensorFlow, Scikit-learn, pandas, numpy, ANNs, CNNs, Transformers, RAG, Generative AI, LLMs, Computer Vision, OpenAI API, LangChain, LangGraph, Agentic AI Prompt Engineering, Automations
- **Developer Tools:** Postman, Git, GitHub, VS Code, Docker, Vercel, AWS (EC2, S3), CI/CD Pipelines
- **Libraries:** Redux, Zustand, Zod, React Hook Form, Vuetify, Pinia, Framer Motion, GSAP
- **Core Concepts:** Data Structures & Algorithms, OOP, Programming Fundamentals, Software Testing

EXPERIENCE

Software Engineering Intern

Securiti AI (A Veeam Software Company) – June/26 – August/26

- Full-Stack Developer Intern, building responsive interfaces and full-stack features using Vue.js, Vuetify, Node.js, and Go.
- Developed MigrateSense, an AI-powered Migration Assistant integrating static analysis, dependency intelligence, automated code transformation, and AI-driven workflows.

Jr. Software Engineer

Zysoftec – March/26 – present

- Diagnosed and resolved bugs across full-stack applications, improving stability, performance, and reliability.
- Collaborated with development teams to debug, optimize, and maintain clean, efficient frontend and backend codebases.

Full Stack Developer Internship

Texinity Technologies (SMC - PVT) Ltd – July/25 – September/2025

- Developed and maintained responsive full-stack applications using React.js, Node.js, Express.js, and MongoDB.
- Built and integrated RESTful APIs while collaborating with the development team to implement scalable and user-friendly features.
- Debugged and optimized frontend and backend systems to improve application performance, stability, and code quality

PROJECTS

MigrateSense - AI Powered Migration Assistant

- Developed MigrateSense, an AI-powered Migration Assistant to automate code migrations across different versions and environments.

- Implemented static code analysis, dependency intelligence, and migration-risk detection to identify compatibility issues.
- Built automated code transformation and diff-based review workflows, enabling developers to approve or reject suggested changes.
- Integrated Generative AI, RAG, Agentic AI, and Multi-Agent workflows with human-in-the-loop automation for intelligent migration assistance.

ZAVIENTA - Digital SaaS Platform

- Worked as a Full-Stack Developer on Zavienta.com, contributing to UI/UX, responsive frontend components, and backend functionality.
- Developed interactive interfaces and integrated backend APIs to ensure seamless data flow and application performance.

Vendore - Multivendor Ecomm Website

- Developed a full-stack multi-vendor e-commerce platform with vendor product management, dashboards, cart, and order processing.
- Built responsive, user-friendly UI with seamless navigation & optimized performance across devices.

HBS - HOSPITAL WEBISTE

- Worked as a Frontend Developer on the HBS Hospital website, implementing responsive and user-friendly UI designs.
- Collaborated with the team to ensure consistent design, performance, accessibility, and usability across the website.

VisionX - Object Detection & Classification System

- Developed a real-time object detection and classification system using YOLO and deep learning models for images, videos, and live camera streams.
- Optimized model inference to improve detection speed, precision, and reliability across multiple object classes.

VidMind

- Developed VidMind, AI-powered video Q&A application using React, Node.js & LangChain to make long-form YouTube content queryable.
- Built a RAG pipeline with transcript extraction, chunking, embeddings, vector retrieval, and grounded LLM responses based on the video's actual content.

EDUCATION

Comsats University Islamabad

Islamabad Pakistan

Bachlor of Science in Computer Science

09/2023 - 05/2027

Punjab group of colleges

Jhelum, Pakistan

FSC

2020 - 2022
